## International Survey\*: Use of OMICs in microbial ecotoxicology

The interest of OMICs responses to stressors is increasing in Microbial Ecotoxicology but many challenges are still to be faced. To contribute highlighting the current and future needs in terms of OMICs data management to open perspectives for risk assessment and biomonitoring, microbial ecotoxicologists are warmly invited to answer an online questionnaire. If you are interested to participate, please visit the following link: <https://www.dragnsurvey.com/survey/r/8dbfe89> (Deadline = September 2<sup>nd</sup>, 2018)
