The international network on Microbial Ecotoxicology

https://ecotoxicomic.org/

September 2021

3rd International Conference in Microbial Ecotoxicology
Ecotoxicomic2022
November 15-18, 2022 / Montpellier, France
https://ecotoxicomic22.sciencesconf.org/

The third edition of the international congress dedicated to microbial ecotoxicology will be held in the Mediterranean city of Montpellier. Cultured, lively and with beautiful old districts, Montpellier is one of France’s most attractive cities.

Sessions

Session 1: Impact of contaminants on microbial diversity and functions
This session will focus on the impact of stressors on the taxonomic and functional diversity of the microbial world, and on the overall response to contamination of microorganisms at individual, population or community level.

Session 2: Microbial roles in contaminant fate and bioremediation
In this session, we welcome original reports on all aspects dealing with microbially-driven processes that contribute to contaminant degradation, detoxification or immobilization, as well as those that enhance toxicity of contaminants and their dissemination in the biosphere.

Session 3: Microorganisms as tool for environmental risk assessment
This session will focus on the use of microbial bioindicators/biomarkers/bioassays as well as of microbial biosensors to assess environmental risk of contaminants in various ecosystems.

Sessions 4 & 5: Special Sessions
Please submit your Special Session proposal

Call for special sessions is open

To better meet the interests of the attendees of Ecotoxicomic 2022, the scientific program will include 2 special sessions, in addition to 3 regular ones. Each session will include 5 to 10 oral communications and an unlimited number of posters. You are invited to contribute to the scientific program by proposing a special session. Within microbial ecotoxicology, special sessions can cover a wide range of thematics and ecosystems (soil, freshwater, marine system...) and provide the opportunity to focus on particular emerging topics, which are not reflected in the regular sessions.

Once the session proposal is accepted by the Scientific Committee, special sessions organizers will take in charge (together with the Ecotoxicomic 2022 organization team) the selection of a keynote speaker, the review and selection of abstracts for oral communications and the chairs for the special session during the congress. Young scientists are encouraged to submit a special session.

The call for special session will be opened until the 31st of October 2021.

More details on:
https://ecotoxicomic22.sciencesconf.org/resource/page/id/5

Abstract submission and registration will be available in early 2022

More information and regular updates will be available on the conference website.
